# OFFSHORE WIND

engineering

## Editorial programme

OFFSHORE WIND ENGINEERING provides the latest information on the technology, techniques and supply chain resources for the Offshore Wind industry.

The magazine and website feature articles and interviews with key industry players, looking at progress to-date and how to meet the challenges ahead. There is also in-depth analysis on projects and developments, innovations and expertise available, together with case studies and technical files. We will also complement our coverage with regular e-newsletters for the sector.
